

Responsive Design for Mobile Devices

RecruiterCMO creates templates that adapt to various mobile and desktop devices, presenting the content in the most usable way possible for the reader. We apply various programming techniques to make this happen and turn to RESS (responsive design with server-side components) as needed to guarantee an optimal experience on networks of all speeds.

Design

Sample Responsive Websites

Working directly with the Nemours' information system team, we were able to add our RecruiterCMO-powered job search feature on the Nemours mobile website.

<http://m.nemours.org/>

Davis is building a group of responsive microsites for Sodexo to target different job categories. Note the appearance of the page as it adapts to the tablet's viewport.
